CAREER GOALS

Short-term Goals (1-2 years):

- Strengthen expertise through courses and hands-on projects.
- Improve technical and soft skills (communication, teamwork, problem-solving).
- Expand professional network and personal branding.

Long-term Goals (3-5 years):

- Become a skilled automation engineer in design,

EDUCATION

Ton Duc Thang University 10/2018 - 2/2024

Control Engineering and Automation

Current achievement : Good (GPA

ACTIVITIES

Ton Duc Thang 04/2021 - 08/2021

Project 1 (EMBEDDED PROJECT)

- Topic: Monitoring and controlling self-controlled solar cells - Microcontroller programming for servo motors.
- Create a light direction sensor.
- Monitor temperature, humidity, light, voltage, and rotation direction of the system.
- Use IOT to send data to the cloud, Google sheet, Red node...

Ton Duc Thang University 02/2022 - 06/2022

Project 2 (SPECIALIZED PROJECTS)

Topic: Wastewater treatment system design project on PLC simulating the system using Siemens TIA V16 software

- Instructions for use on PLC.
- SCADA design.
- Data collection.
- Error and security warnings.

Ton Duc Thang University 04/2023 - 08/2023

Graduation thesis

Topic: Flyback circuit design, simulation on Matlab software.

- Use Simulink on matlab to design and calculate.
- Electronic calculation of Input/Output power.

PRIZE

Elected as a staff member for 4 years, highly appreciated by teachers and classmates. 2018

Won 3rd prize in the competition to learn knowledge about Electrical Safety organized by the school. 2019

Third Prize in three PCB circuit design competitions. 2020

Second Prize in an AutoCAD drawing competition 2022

Third Prize in the team competition for the Line-Following Robot Race 2022

WORK EXPERIENCE

TID COMPANY LIMITED 4/2022 - 8/2022

programming, and system maintenance.
- Advance into leadership and project management roles.
- Contribute to R&D and share knowledge through mentoring and training.

SKILLS

Team player & Communication

Analytical Skills

English Communication

Logical and Analytical Thinking

Strategic & Operations

INTERESTED

- Gym, running, listening to music, and traveling.

Nguyễn Thị Ngọc Dung (**Deputy Director**)
sđt: 0906365785

CERTIFICATE

- Have MOS degrees in Word, Excel, Power Point 2019

- IELTS 6.0 2022

Intern

- Worked on radio station amplification systems, transceivers, and cameras.
- Worked with CAD drawings and quantity take-off.
- Read and interpreted technical drawings.
- Installed electrical wiring for control panels.
- Installed and set up low-voltage electrical devices such as CCTV, transceivers, and door access systems.

NORTHSTAR ADJUSTER JOIN STOCK COMPANY 11/2023 - 5/2024

Loss Adjuster

- Assessed damage from natural disasters to structures and equipment (inverters, pumps, solar panels, building structures). Collected evidence, took photos, and documented losses for compensation evaluation.
- Worked with clients, property owners, and insurance representatives to verify claims.
- Analyzed insurance policies and collaborated with engineers for accurate damage assessment.
- Prepared detailed reports and recommended compensation amounts for non-life insurance companies.
- Conducted injury and accident assessments at resorts booked via Airbnb, gathering information from medical staff and resort management.
- Recommended compensation based on the extent of damage and losses.

KTT INVESTMENT GROUP JOINT STOCK COMPANY 3/2024 - 9/2024

Technician

- Develop shop drawings and perform quantity take-off for MEP systems, including HVAC, electrical, ELV, and plumbing systems for buildings and industrial facilities.
- Review designs and tender documents; calculate quantities and oversee construction quality to ensure alignment with project specifications.
- Track construction progress, verify executed quantities, and ensure construction quality meets the approved design and contract requirements.
- Carry out additional tasks as assigned by supervisors.

INDUSTRIAL ENVIRONMENTAL SOLUTIONS CO., LTD 11/2025 - 3/2025

Technician

- Created show drawings based on project requirements. Conducted site surveys at construction sites to gather real-time data.
- Updated drawings based on field observations and measurements.
- Compiled final drawings into project binders for documentation and further use.
- Designed and worked on piping systems and storage tanks. Created detailed drawings for pipe layouts and tank installations
- Created 3D designs for various components and systems to prepare for manufacturing.
- Used CAD software to model and simulate the designs before the fabrication process.

ADDITIONAL INFORMATION

Software skills: Auto CAD 2D,3D, PI&D, PLC ,SCADA , Excel
